

Help Make your Home the Solution to Stormwater Pollution!

As stormwater flows over driveways, lawns, and sidewalks, it picks up debris, dirt, and other pollutants. Stormwater can flow into a storm sewer system or directly to local streams, rivers, and lakes, **UNTREATED**. Polluted runoff is the nation's greatest threat to clean water. You can help make your home part of the solution to this type of pollution by:

- *Not dropping trash in gutters or down storm drains.

- *Cleaning up after your pet and disposing of animal waste in the trash or toilet.

- *Washing your car with a biodegradable detergent or going to the car wash where wastewater is recycled.

- *Recycling household chemicals and paints at the Convenience Centers, never dump them in storm drains.

If you have any questions, or would like more information, please contact the Fort Campbell Environmental Divisions, Stormwater Branch at (270) 798-9588.
